

## Staff Report

### May 8, 2018

**TO:** Honorable Mayor and Members of the Town Council  
**FROM:** Brit Snipes, Town Engineer  
**DATE:** May 8, 2018  
**RE:** Shade Structure Options

#### Recommendation

Staff recommends the Council direct Staff to purchase and install a portable shade structure at Blue Anchor Park.

#### Issue Statement and Discussion

At a previous meeting of the Town Council, Council requested that staff investigate placing a shade structure at Blue Anchor Park near the spray pad.

Staff researched options and determined that the most cost-effective path is to purchase a shade structure and have the maintenance crew install the structure.

Attached are three options ranging in cost from \$ 500 to \$5,000

Option 1 – Costco 10' by 20' portable Shade Structure	\$ 550
Option 2 – 4 post, 8 feet tall, 16' by 20', rectangular hip roof	\$ 3,000
Option 3 – 4 post, 10 Octagon	\$ 2,825
Option 4 – single post umbrella 10 foot tall	\$ 2,835

Staff recommends Option 1. A portable shade structure can be secured to the site with minimal infrastructure and improvements to the site. The other three options would require additional infrastructure and limit our options for maintenance and replacement of the fabric shade structure. In the future the Town decides to provide a more permanent shade structure, it is Staff opinion that a solid roof be considered. Solid roofing would cost more up front but would be a better value over time when considering maintenance and replacement due to vandalism.

#### CEQA Requirements

This project is exempt under the California Environmental Quality Act (CEQA)

#### Financial and/or Policy Implications

## UV, Heat, and Hail Protection

The Hip Rectangular Shade will protect from sun, heat, hail, and UV rays. Made of high quality fabric, covering all-steel tubing structure. Lockstitch technique prevents frays or unraveling. Available in standard or custom sizes, these shades can fulfill any need for shelter. Shade blocks up to 97% harmful UV rays and can reduce area temperature by up to 30 degrees. Structure is engineered to withstand wind gusts up to 90 mph with fabric, and up to 150 mph with fabric removed.

It is the buyer's responsibility to check their local building and fire codes to determine the compliance requirements in your community.

We can work with you to customize a solution that meets just about any specific compliance requirements, call us at 1-800-323-5664.

### Features

- Corrosion Resistant, Powder-Coated Steel Tubing
- Mildew and Rot Resistant Fabric
- All Steel Tubing and Bolts Meet or Exceed ASTM Standards
- Free of Sharp Edges and Corners
- Fabric is 100% Recyclable

### Ultimate Protection

The Hexagon Shade will protect from sun, heat, hail, and UV rays. Made of high quality fabric, covering all-steel tubing structure. Lockstitch technique prevents frays or unraveling. Available in standard or custom sizes, these shades can fulfill any need for shelter. Shade blocks up to 97% harmful UV rays and can reduce area temperature by up to 30 degrees. Structure is engineered to withstand wind gusts up to 90 mph with fabric, and up to 150 mph with fabric removed.
